## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-5, 6/1, 6/3, 6/4, 6/5, 7/6/1, 7/6/3, 7/6/4, 7/6/5, 10/1, 10/3, 10/4, 10/5, 10/7/6/1, 10/7/6/3, 10/7/6/4, 10/7/6/5, 11, 12/6/1, 12/6/3, 12/6/4 and 12/6/5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Everhart '387 (note especially Figures 1, 2 & 4-7; column 2, lines 10-33; and column 3, lines 4-13).

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 6/2, 7/6/2, 8/1-8/5, 9, 10/2, 10/7/6/2, 10/9, 12/6/2 and 13/8/1-13/8/5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Everhart '387. Everhart '387 discloses the claimed invention except for the height, width, depth and thickness dimensions as claimed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the device of Everhart '387 from Applicant's claimed dimensions,

Art Unit: 3673

since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

### ***Response to Amendment***

In response to Applicant's arguments on pages 3-6 of her amendment concerning the claims and the Everhart '387 reference, it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138. Hence, the rejections under the prior art have been respectfully maintained.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3673

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
